ABOUT THE FUND

The Ignite 500 Matrix LP Bitcoin Fund ("The Fund") aims to capture the total return available to investors in bitcoin, the first and largest cryptoasset in the world. The fund invests exclusively in bitcoin and offers investors an innovative, cost-efficient, and secure way to access the bitcoin market. Bitwise uses professional trading expertise to minimize transaction costs, and assets are held in 100% cold storage with one of the world's leading cryptoasset custodians.

ABOUT THE FIRM

Ignite500 is a specialist cryptoasset manager and multi-strategy applied venture investment firm inexorably focused on innovative technologies and funds. The firm has deep expertise in asset management and investment strategy designed to offer investors exposure to bitcoin, the largest and most liquid digital asset, through an institutional-grade private fund, Ignite 500 Matrix LP, designed to provide exposure to bitcoin in a fund structure that is familiar to investors and that provides regular monthly statements and standard tax documentation.

WHY THE IGNITE 500 MATRIX LP BITCOIN FUND?

Established

Bitcoin is the most established cryptoasset in the world, with a 10+ year track record and the largest base of users in the crypto-market. Originally proposed in a 2008 white paper by the pseudonymous Satoshi Nakamoto, bitcoin was envisioned as "a purely peer-to-peer version of electronic cash" and has since grown into a global financial and technological phenomenon.

Institutional

As an institutional asset manager, Ignite 500 has access to professional trading solutions and custody partners, simplifies management and reporting, and works with best-in-class service providers. For many investors, financial reporting costs related to the fund are expected to be lower than the costs associated with the purchase, storage, and insurance of physical bitcoin.

Security

Custody is a critical component of cryptoasset management. The Fund's bitcoin are held in 100% cold storage with multisignature configuration. Ignite 500 uses a third-party custodian and continuously evaluates security developments to stay up-to-date with industry best practices.
